SUMMARY:

Cloud Data Engineer with 2+ years of experience building and supporting GCP-based data pipelines, cloud platforms, and AI-enabled applications using Python, SQL, PySpark, Git, CI/CD, and Docker. Experienced in performance optimization, troubleshooting, security, and scalable cloud data processing.

CORE SKILLS:

Cloud & Data: AWS, Azure, Databricks, Snowflake, Redshift, S3, ETL/ELT, PySpark
Programming: Python, SQL, Bash, Java, TypeScript
DevOps & Systems: Git, Jenkins, CI/CD, Docker, Linux, REST APIs
AI/ML: LangChain, LangGraph, RAG, AI evaluation, guardrails
Security & Tools: RBAC, IAM concepts, Jira, Confluence, Agile/Scrum

PROFESSIONAL EXPERIENCE:

CitiusTech

Data Analytics Engineer | *May 2024 – Present*

- Built and supported scalable GCP-based data pipelines processing 8–10M+ healthcare records daily using Python, SQL, PySpark, Databricks, and cloud storage services.
- Developed ETL/ELT workflows for clinical, EHR, billing, and operational datasets, supporting reliable ingestion, transformation, and downstream analytics.
- Worked with GCP cloud services, IAM concepts, storage, compute, and data-processing environments to support secure and scalable data workloads.
- Optimized distributed PySpark workloads using partitioning, caching, and query tuning to improve processing performance and cloud resource utilization.
- Monitored production pipelines, investigated failures and data-quality issues, and performed root-cause analysis to improve platform reliability.
- Validated 40+ enterprise datasets and strengthened automated quality controls, reducing downstream data defects by approximately 45%.
- Applied role-based access controls, validation checks, and secure data-handling practices for sensitive healthcare data.
- Collaborated with engineering and analytics teams using Git, Agile workflows, and cloud-based development environments to troubleshoot issues and deliver production changes.

AgenticAISchool

Full Stack AI Engineer | *Jan 2026 – Jul 2026*

- Built an AI-powered assessment platform using TypeScript, Node.js, React, PostgreSQL, Prisma, and REST APIs, reducing question-preparation time from 60–90 minutes to under five minutes.
- Implemented RAG and agentic workflows using LangChain, LangGraph, embeddings, vector retrieval, grounded context, and structured outputs to generate accurate educational content.
- Integrated Hume AI EVI using WebSockets and server-sent events to deliver conversational interview practice, personalized feedback, and downloadable PDF reports.
- Implemented JSON-schema validation, prompt guardrails, evaluation checks, retry handling, duplicate controls, logging, and monitoring to improve AI reliability and reduce hallucination risk.
- Developed Jest tests, supported QA and staging validation, managed database migrations, and containerized application services using Docker.

- Collaborated with instructors, testers, and product stakeholders to refine requirements, resolve defects, and deliver production-ready AI features.

Accenture

Adv App Engineering Associate | *Aug 2021 – July 2023*

- Built Python and SQL ETL/ELT pipelines using AWS and Snowflake to integrate credit-risk, financial, and retail data for enterprise analytics and reporting.
- Implemented change data capture pipelines using Qlik Replicate and Snowpipe, enabling reliable incremental loads and near-real-time data availability.
- Developed dbt transformations and automated data-quality tests, integrating delivery checks with Git and Jenkins CI/CD workflows.
- Automated Airflow-based AWS S3-to-Redshift workflows and optimized Databricks/PySpark processing, reducing data-transfer time by 40% and improving query performance by approximately 30%.
- Applied role-based access control, data masking, validation, and monitoring controls to protect sensitive financial data and support compliance requirements.

EDUCATION:

Arizona State University

Master of Science in Information Technology | May 2025

Relevant Coursework:

Cloud Computing & Architecture | Computer Networks | Information Security | Database Management | Distributed Systems | Software Engineering | Data Analytics | IT Project Management

Malla Reddy Engineering College

Bachelor of Technology in Information Technology | May 2022

Relevant Coursework:

Operating Systems | Computer Networks | Linux/Unix Fundamentals | Database Management Systems | Object-Oriented Programming | Data Structures & Algorithms | Software Engineering | Cloud Computing

CERTIFICATIONS

AWS Academy Cloud Foundations — Amazon Web Services / Arizona State University
Microsoft Certified: Power BI Data Analyst Associate (PL-300)
Palantir Foundry & AIP Builder Certification
Agentic AI Mastery Certification
